Work experiences

2014-present. Lead iOS developer, Wimdu

I joined Wimdu to create the mobile apps. The first months were dedicated on shaping and developing autonomously the Host app (iOS + APIs). Then to scale to a team of 9 people in order to maintain and improve the Host app while working on the new Guest app.

2013-2014. 1 year. Lead iOS developer, myDriver

I have been first focused on stabilizing and improving the current public app and rewriting the driver's app. Then I worked on the next public version, building a new architecture, defining APIs and designing the UX.

2011-2013. 2 years. Experienced iOS developer, Playadz

Full enterprise framework design and implementation. Quote writing, mobile strategy consulting assignments. Study and development of 15 iPhone and iPad apps: Nature64, Cannes is Yours, Odysseum, Club14, Cap3000, etc.

2009-2011, 2 years. iOS developer, Intellicore

Study and development of 20 iPhone and iPad applications: iRATP, MacBidouille, Thesorimed, Fabled Lands, etc. Responsible for the entire project process: from writing specifications with the customer to the app development and App Store submission.

2008-2009, 9 months. iPhone developer, Intellicore – Mobile tourist guide

- Master's degree internship
- Objective-C, X-Code
- iOS 3, MapKit

2008, 3 months. Web developer, Sogeti – Requirements management system

- PHP 5.2, CakePHP 1.2
- JS + PDF export
- Apache + MySQL

2006, 5 months. C++ developer, Systerel – Unit test generator & firewall syntax matcher

- Internship, C++ code
- Input: pseudo-code
- Output: test scenarios
- Use of ANTLR
- Output: IPTables rules

Degrees
